

So when you're looking for a supplier, what are you looking for?

A company that gets it right with no fuss & bother. Part of our service incorporates sourcing, design and a full installation service. Or we can just deliver, to one location or multiples all on the same day. As much or as little as you need from us.

So that's delivery what about cost?

We're not going to rabbit on about cost being only half of the story and that you only get what you pay for- that's a given. We're all adults and we've been in business for a while, you don't need lectures from us.

We're not cheap, in fact we'd be really bothered if we were. But we do know you've got budgets and they are mostly set in stone. So we stick to them.

Well actually, we try and leave you some change for the times you need some elbow room.
